EMERSON PIANO-FORTES.

THE EMERSON PIANO COMPANY.

Are desirous that their instruments shall be subjected to the strictest tests. By care in selecting materials, and by rigorously insisting upon perfect work, they produce instruments that are **ABSOLUTELY UNSURPASSED.** The mechanism of the Piano-Forte is simple and easily understood. There is no secret nor mystery about it, as some shrewd advertisers would have the public believe. The solidity of the frame and case, the well-chosen, well-seasoned and well-wrought wood of the sounding-board, the perfection of the hammers, dampers and strings; the unyielding firmness of the pins, the scientific voicing and tuning—these are the elements necessary to form **Perfect and Satisfactory Tone.**

More than Twenty-three Thousand of these Pianos have been made and sold, and the **standard of excellence was never so high as now.**

Superior Upright Pianos to Rent. Every Piano Warranted for 7 Years.

To persons of musical taste, willing to trust their own ears, the Company submits its instruments, confident that in sonority, evenness, crisp action, sustaining power and durability, they are not anywhere excelled.

INTRODUCTORY.

THE usual time for a new edition of the CAMBRIDGE DIRECTORY has again come, and we present No. 29 of the regular series to our patrons, with the confidence of its welcome reception by them, as well as by the public generally.

As cities grow in importance and population, the directory increases in value, as a book of reference, until large cities like Boston and New York could not possibly get along without their annual publication. A good directory is a great benefit to a city, not only to the citizens, but to strangers and visitors, who are constantly referring to its pages for information of some kind. We also often receive orders from distant parts of the country for our directories, which show that their circulation is not necessarily limited to the cities they represent.

We wish especially to call the attention of persons using the directory, to the importance of knowing the precise spelling of a name, before looking for it, as names, pronounced the same, but spelled in various ways, will appear on different pages, and at quite a distance from each other.

The revival of business, which has so long been looked for, has at last come, and we trust that the merchants and manufacturers of Cambridge will feel the effects of it to such an extent, that, when our next edition is published, we shall receive an increased patronage from them.

Names in Directory 1879,	17,733
" " " 1880,	18,250
Increase,	517

Our agents have received the usual courteous attention from all with whom they have come in contact, while obtaining the information for this number, and with many thanks for the same,

We remain very respectfully,

THE DR. PIERCE

WROUGHT IRON FURNACE,

Manufactured and Sold by

THE WOLLASTON

Heating AND Ventilating Co.,

24 UNION STREET, BOSTON, MASS.

Is essentially a Wrought Iron Furnace, it being one plain sheet of heavy plate iron from top to bottom. During six years' test not one has failed to satisfy the user, nor has one (of the large number in use) been known to emit a particle of gas, or require any repairs whatever.

No Heater yet made does more effective or satisfactory work. It is so constructed that it never requires any cleaning out. It is very easily managed, has an opening to remove any clinkers without dumping the grate. It is made in four sizes, and is guaranteed to give entire satisfaction. It is worthy of investigation. Send for circular.

Messrs. S. & W. have the entire product of my quarries, for twenty-five years known as "Brownville" or "Bangor Maine Slate," the standard slate of New England; awarded a Silver Medal by the Mass. Charitable Mechanic Association; and the "Centennial Medal" the *Highest Awards to Roofing Slate.* As my quarries are the only ones making this peculiar quality, architects, builders, and others, by specifying "Merrill's No. 1, Brownville, Me. INSTRUCTION TO KEY HOLDERS.

Alarms are to be given from the box nearest the location of the fire.

To give an alarm, open the door, pull the hook to the bottom of the slot once, and let go.

Each box contains a small bell which, if heard before you pull, indicates that the alarm has been previously given. Any person listening at a box will learn the number of the box from which the alarm was given.

For instance: if an alarm proceeds from box 36, the bells and gongs attached will strike three, then after a short pause six consecutive blows, thus: III—IIIIII.

Don't give an alarm for a fire seen at a distance, unless assistance is called for.

Citizens are earnestly requested to inform themselves where keys to the signal boxes are kept; signs, suitably inscribed, being placed over each box, giving the requisite information.
